

Job & Sports

Sports as a medium for the integration of disadvantaged young persons into the job market in context of the community vocational action programme of Leonardo da Vinci

The project job & sport is submitted in the context of the EU-programme Leonardo da Vinci. The Applicant is the Stadtsportbund Göttingen e.V.. The implementation of this project takes place in six national local networks. In Germany - in Göttingen - the local network consists of the Employment promotion department of the City of Göttingen (Amt für Beschäftigungsförderung der Stadt Göttingen), the Institute for sport sciences of the Georg August University (Institut für Sportwissenschaften der Georg August Universität), and the professional training schools Ritterplan (berufsbildenden Schulen Ritterplan). The European partners are local networks in Madrid, Schio/Venice, Ljubljana and Montpellier. The project is planned for a duration of three years. The goal of this project is to improve the professional integration of disadvantaged adolescents and young adults through the medium sport.

The project is divided into the following temporal and content wise phases.

- European-wide investigation

on the connection of key qualifications and vocational integration of young persons, considering specially young women, as well as on the potential and the possible function of sport here. It applies to identify, under which favourable basic conditions, social behaviour can be promoted or obstructed by sport.

- Production of a practice-oriented concept, in which sport is used as medium and method in employment promotion of young people.
- Application of the model project in all the partner countries: The concept will be adapted and tested in sport organisations, in schools, in measures of the employment promotion and in training enterprises

according to the local needs. Target group are at first female disadvantaged young persons.

- Project-accompanying evaluation.
- Evaluation and revision of the theoretical and practical results, correction of the concept.
- Renewed practice phase with consultation also of male young persons.
- Evaluation of the results, production of material and training courses for multipliers (multipliers).
- Presentation, publication and dissemination of the results.

The European partner take part, dependent of the respective institution, on different levels in the project:

- Scientific co-operation
- Practical testing and execution
- Evaluation
- Translations
- Responsibility for the IT
- Execution of training courses
- Advisory activity.
- Multiplier (multiplier) training
- Conceptual co-operation (co-work)
- Material production
- Dissemination of the results
- Administrative activities
